MAXIMISE RELIABILITY AND
MINIMISE THE RISK OF SYSTEM FAILURE?

It works.

» BLUESERV IS SO RELIABLE THAT IT EVEN INCREASES YOUR PRODUCT QUALITY

"THE SYSTEM MUST RUN – ALWAYS. BLUESERV CAN
HELP YOU HERE. IT REDUCES THE RISK OF SYSTEM FAILURE
AND PREVENTS INCALCULABLE SUBSEQUENT COSTS."

SAFETY AND PLANNING ABILITY FOR THE PRODUCTION OF CHEMICAL POWDERS

The lifetime of a Hosokawa Alpine machine for the production of chemical powders is more than 50 years. A long time during which quite a lot can – but need not – happen. **Because as a development partner, process consultant and market player, we are there for you throughout the entire life cycle of your system.**

We are your personal service experts. With the service brand BLUESERV,

we offer you a package of services tailored to your requirements which maximises the reliability of your machine and minimises the risk of system failure. Profit from over 115 years of expertise “Made in Germany” on the sectors **maintenance and repairs, servicing and operating security as well as process stability and quality assurance.**

BLUESERV SERVICE FOR THE CHEMICALS INDUSTRY

HIGH SYSTEM AVAILABILITY, SAFE PRODUCTION.

SPARES & REPAIRS

The production of chemical powders makes a number of different service procedures unavoidable. With BLUESERV, you can keep these under control. We exchange components in good time and repair your system quickly and reliably.

LABORATORY SERVICE

Hosokawa Alpine systems are known for the constant high quality of the end product. The BLUESERV laboratory service ensures exact particle size analysis thanks to regular calibration and maintenance of your air jet sieves.

SAFETY CHECK

Especially when handling chemical materials, the Hosokawa Alpine BLUESERV safety check provides maximum safety. It protects your personnel and the environment, and last but not least also your valuable production capital. Including 100% conformity.

VIB & PIN SOFTWARE

Optimise your powder production with BLUESERV. To this end, the PIN software documents and exports data automatically. The mobile VIB system monitors the condition of the machine and carries out wireless vibration measurements.
